

To our valued OmniActive partners,

As the fight against COVID-19 continues, OmniActive's Improving Lives Foundation has dedicated its efforts to support those who have stepped up to serve our communities. We have deployed key initiatives to deliver solutions for various rising needs as well as to provide relief for those who are most vulnerable to their effects, which include:

- Sanitation kits for frontline workers (police, airport, port authority and municipal workers)
- Meals for daily-wage laborers through Rotary clubs
- Funding rations for village councils near plants
- Supporting hospitals and healthcare workers with testing kits and PPE
- Educating farming communities on COVID-19, safety, and hand washing practices as well as dispensing soap

Moreover, we continue to ensure our supply chain remains intact so that we may still deliver on our mission: To enhance nutrition and improve lives. To do so, our facilities are running on strict social distancing and hygiene controls as illustrated in this short, informative video.
